

Introduction IACMI
Members Meeting

July 2018

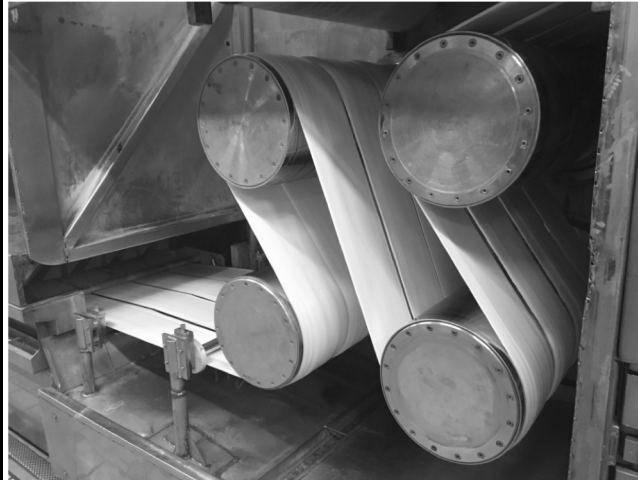

Miranda de Ebro, the largest acrylic fiber plant in Europe

PLOT AREA: 302,656 sqm (75 acres)
BUILT AREA: 52,213 sqm (562.016 sqft)
EXPANSION AREA: 581.100 sqm

POWER CAPACITY: 7,971 KW
SPINNING LINES: 7
COGENERATION: 48 MW

PRODUCT: Acrylic Fiber
CAPACITY: 100 kTons per year

EMPLOYEES: 160 PEOPLE

HIGH EFFICIENCY CARBON FIBER

- Investment driven by entry in industrial carbon fiber market leveraging Montefibre's cost efficient T-PAN
- ORNL identified Montefibre as new source of T-PAN
- CFTF developing the processing parameters to produce highly competitive ULT-CF
- Joined IACMI to match fiber with applications benefitting from specific ULT-CF profile and to enable efficient tow handling
- Committed to developing new generations of PAN & CF
- Become highly competitive and reliable carbon fiber manufacturer
- Offer more efficient industrial CF, bringing down total cost, enabling new applications and supporting downstream growth
