Project Summary (2-3 paragraphs):

Provide a short summary of the project (i.e., problem to be solved, need for a solution, market opportunity that will be addressed).

Please answer the following questions (1-2 pages total):

Which IACMI goals does this project idea support (cost, energy, recycling, new materials)? (i.e., What is the project trying to achieve?)

What is the specific scientific/technical challenge limiting the idea from working now (i.e., What is the problem—why can't we do it today?)

What is the technical approach to solve the challenge (i.e., How are we going to overcome or fix the problem identified?)

What is new or innovative about this project idea (i.e., How is it different than what has been done before)?
