

A DECADE OF INNOVATION *IACMI's Impact*

Economic Growth

For 10 years, IACMI has implemented a formula that works. **Technical Innovation + Workforce Development = Economic Growth.** IACMI has catalyzed the creation of research-at-scale, production-relevant, shared spaces for innovation and workforce development. **Who We Are:** A Manufacturing USA institute with a 170+ member community of industry, academia, national laboratories, and government agencies

Benefits of Composites

- ✓ Enhanced Strength and Durability
- ✓ Lightweight and Stiff Performance
- ✓ Corrosion Resistance
- ✓ Aesthetics and Design Flexibility
- ✓ Versatility in Transportation, Energy, and Infrastructure

Advanced composites can make aerostuctures lighter, cars safer, and bridges last longer.

Discussions through IACMI trigger thoughts, help connect and formulate relationships. IACMI helped us understand customer pain points and the need for scale.

—Kevin Retz, NAWA America
N A W A H

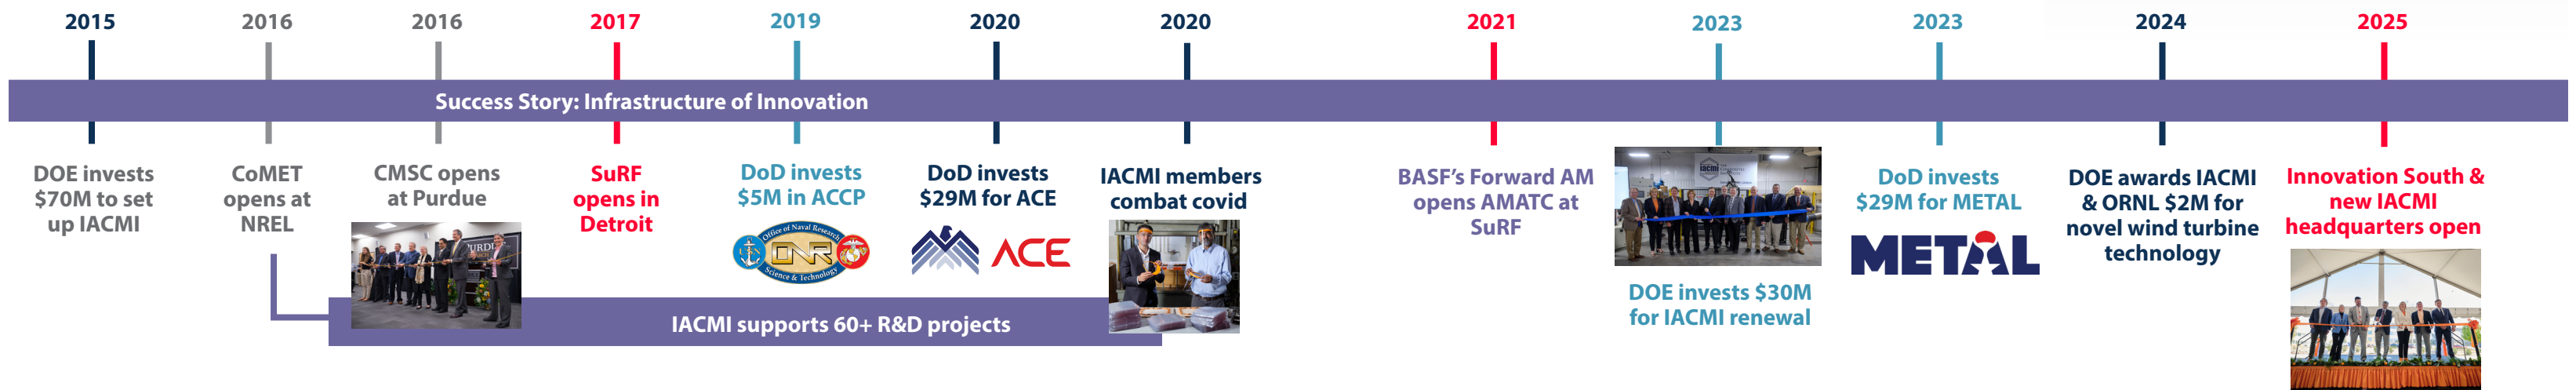

SUPPORTED BY

IACMI was established in 2015 and renewed in 2023 by the Advanced Materials & Manufacturing Technologies Office (AMMTO) in the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE).

Since 2019, IACMI has scaled up workforce programs for the U.S. Department of Defense including for the Industrial Base Analysis and Sustainment (IBAS) program within the Innovation Capability and Modernization (ICAM) office.

Impacting Economic Development Across the U.S.

\$400M Value of scale up facilities across 8 states

3,000 new manufacturing jobs announced

\$150M in Research & Development value

Public-Private Collaborations

“IACMI has a collaborative culture that increases the speed of innovation.”

—Steve Bassetti, Michelman
MICHELMAN

What happens when IACMI *convenes, connects, and catalyzes*? Effective collaborations. Networking is the heart of IACMI’s purpose, bringing together 4,500+ people through Members Meetings. Members and IACMI technical experts tackle the composites industry’s toughest challenges through Working Groups focused on key sectors. Together, members forge partnerships, create new supply chains, and build an ecosystem of innovation.

IACMI has created an ecosystem where Small Medium Enterprises (SMEs) can thrive.

- ✓ Visibility, exposure to OEMs through projects
- ✓ Access to expertise and specialized equipment
- ✓ Help navigating the “valley of death”
- ✓ Cost-effective demonstration projects
- ✓ De-risking of new technology
- ✓ Validation of business models
- ✓ Recognition and awards

IACMI Working Groups

Robust model of involvement for members

High Rate Aerostructures Fabrication

Future Mobility/Vehicles Technology

Wind Energy

Infrastructure and Construction

Recycling/Circular Economy

COLLABORATIONS

2016-2017

IACMI project with ORNL and Local Motors enhances BAAM

2017

ORNL 3D prints tooling with Techmer material

2019

TECHMER PM
POLYMER MODIFIERS
Techmer invests to expand 3D printing materials capacity

2019-2021

IACMI project with Purdue, Techmer, Thermwood creates AM materials database

2020

Allegiant Stadium installs world’s largest 3D printed sculpture

2020

Dassault Systemes co-locates at Purdue’s CMSC

2021

Purdue opens LSAM lab & forms CAMS consortium

2022

Purdue begins licensing ADDITIVE3D software

2024

Thermwood and Purdue demonstrate LSAM at JEC World

Success Story: Additive Manufacturing of Composites and Tooling

Technical Innovation

Technical innovation has been central to IACMI's mission from the beginning, including investments in diverse, scalable composites manufacturing facilities across eight states. Our current focus is leveraging these resources to drive advancements in wind energy, aerospace, automotive, and infrastructure projects.

	Goal	1.0 Projects Achieved	2.0 Projects Projected
\$	Reduce production costs of composites	25%	50%
	Demonstrate recyclability or reusability	80%	95%
	Lower Embodied Energy	50%	75%

IACMI 1.0 projects

“IACMI's SuRF facility gave us access to equipment and tooling we would never have been able to afford on our own.”

—Andrew Maxey, Vartega

IACMI also:

Increased Technology Readiness Levels in additive, vehicles, wind turbines and composites recycling

Improved composites manufacturing via process simulation and quality control

Success Story: Manufacturing of Recyclable Thermoplastic Wind Turbine Blades

NREL demonstrates technology at 9-meter length (TRL 5)

NREL fabricates 13-meter thermoplastic blade (TRL 6)

NREL completes validation testing of 13-meter blade (TRL 7)

LM WIND POWER

LM Wind Power scales thermoplastic blade technology to 62 meters (TRL 8)

ARKEMA

60+ Collaborative and industry-led technical projects

90+ IACMI members participating on technical projects

25 new products and technologies commercially available

\$150M in research and development value

Workforce Development

IACMI's WD programs build a robust talent pipeline from "K to gray" for U.S. advanced manufacturing. Through STEM events, workshops, online courses, and hands-on training, IACMI inspires and educates students about advanced careers in composites (ACCP), CNC machining (ACE), and casting & forging (METAL). We're preparing and connecting next generation machinists and engineers to further education, internships, apprenticeships, and rewarding careers.

Success Story: K-Gray Training in Advanced Manufacturing

2016
Internship program 1.0 begins

2017
Composites One workshops begin

2019
\$5M MEEP award for ACCP

2020
UT Professor Tony Schmitz launches IACMI-ACE online training

2021
ACE testbed at UTK for hands-on CNC training

2023
SkillCrafters 1400+ for grades 6-12

InnoCrate pilot, 2000+ K-12
1000+ trained in composites through ACCP

2024
METAL launches bootcamps, workshops, outreach, & apprenticeships

2024
CAMX
InnoCrate wins CAMX ACE award

2025
Internship program 2.0 begins

5100+ Hands-on advanced manufacturing training

18,300+ Students engaged in STEM Outreach

12,400 Online training in all 50 states

100 Internships with industry collaboration

Leveraging Resources

ACMI has helped members leverage resources in two ways. The first is empowering them with access to equipment, facilities, and expertise they would not otherwise have. The second is through enabling companies and universities to secure additional funding, building on innovations and resources facilitated by IACMI. Early investments from the Department of Energy paved the way for the Department of Defense to establish critical, scalable training programs in CNC machining, casting, forging, and of course, composites.

“IACMI is a vital asset for any company looking to grow their business needs in composites.”

— Dale Leftwich, JR Automation

Catalyzing Additional Funding

IACMI Member Recipients	Source of Funding	Amount (\$M)
Workforce Development (ACCP + ACE + METAL)	DoD	69
R&D \$ for universities (Purdue + UTK + UDRI)	NSF, CERN, DOE, DoD	53
R&D \$ for federal labs (ORNL + NREL)	DOE	36
Investment in new manufacturing facilities	TPI	25
Investments in startups and SMEs	Innovation Crossroads, Diamond Edge Ventures	17
R&D \$ for industry (Ford + GM + SuRF)	DOE	15
Total		\$215M
